

COURSE EVALUATION

INSTRUCTOR: Brenda Aron/Tamara Moxham DATE: 03/29/2010 COURSE: ITP 250

1. What aspects of the teaching or content of this course do you feel were especially good?

- Community work
- The support and encouragement were and always have been phenomenal! I love those ladies!!
- Chance to talk about our experiences out on our jobs and get feedback from peers and instructors
- Everything, I really enjoyed this class
- It was nice to have a class where we could go to talk about any problem I may have had
- The teacher, the hours outside of class
- Providing a positive, safe learning environment- complete with two caring individuals who genuinely respect my role not only as a student, but as an interpreter in the field and adult

2. What changes could be made to improve the teaching or content of this course?

- NEW LAB, this is ridiculous. My grade got docked because of the lab...why should I suffer if I pay \$150/quarter to use the lab?
- None
- Updating the lab! The equipment constantly falls- the audio cut out for our final and it affected our grades. I am appalled that we pay a lab fee for equipment that doesn't work!!
- Needs to be more credits because we do a lot of work
- The lab equipment!!! We need new technology so we can benefit from everything@ this needs to be change so students in the future will not have these struffles we are having! This is very serious and something needs to be done! Now!
- The lab that we are having to use for the tests in this class and all of the other ITP/ASL courses is extremely difficult to work with, and it is not conducive to an effective learning experience in the least! All of the students and faculty members involved in the program are growing increasingly frustrated with the lack of decent resources to utilize for our courses. This lab is the only resource we have to prepare us for the real world of work, and its just not working! PLEASE take this into consideration. As it stands, I would nto recommend anyone to come to this program...this school simply does not equip us to succeed in our profession
- Fix the sink in the yellow room. It wasn't that good going in to a smelly room
- Technology in the lab needs to be updated!! The entire class was docked 24 points on the final because the equipment didn't record the audio. That is unfair and it hurt my grade. Change it please! Give us better equipment!
- Both the teachers are hard to approach. Brenda tends to misunderstand what's said. Then she holds it against you later.
- LAB EQUIPMENT!! Seriously, it screwed up my final test
- The lab!! Due to malfunctions that occurred in the SCCC ITP lab, points were deducted form a FINAL test. Such a deduction, I feel, is not only inappropriate, but unnecessary as well. PLEASE do something proactive with this matter as soon as possible

3. Use the back for additional comments for special questions.

- We need new lab equipment! It has started to affect our grades! New lab equipment!!!
- I have a hard time with Tamara's way of teaching. I understand that most of our class is young but that shouldn't mean that we are reprimanded like children. Please give up new lab equipment!! This is getting ridiculous
- New lab equipment! The voice recording doesn't work
- The audio on my test didn't work, which means the teachers took away points. Taking way points on my last test, that is awful!
- Because of the faulty technology in the lab, all of our voices did not record and it hurt our grade, even though its not your fault!
